YOUNG AMERICA. A GENTS wanted in every county in this and adjoining States to sell the above new and improved CORN AND COB MILL. To all such, a rare chance to make money will be offered. Exclusive State and County

ileges will be disposed of on unusually fair terms, by FARMERS AND STOCK RAISERS,

I offer you a Corn and Cob Mill unsurpassed in the Emon, and which cannot be superceded by past or future inventions. It is the very Mill which every Farmer and Stock Raiser should have, it will crush from S to 10 bushels Corn and Cob per hour, with one horse; is easily fitted up and managed, weighs \$40 lbs., and as all contact of the grinding surfaces is prevented, will last any farmer an ordinary lifetime. I speak thus of its durability because the same principle has been fairly tested in the old Bark Mill. Who is it that wants

A MILL ON TRIAL

for one month, and if it don't give complete satisfaction, to return it? If there be any man thus disposed, let him now speak. Satisfaction is warranted in every case, or the money will be refunded. This Crusher can be attached to horse, water or steam power, which renders it the most convenient Mill south of Mason's and Dixon's line. All other Crushers now in the south require too much power. other Crushers now in the south require too much power, or will soon wear out. According to THE LAWS OF NATURE

a Corn and Cob Mill which admits of a lateral or wabbling a Corn and Cob Mill which admits of a lateral or wabbing motion, will, necessarily, soon wear out, all other Crushers are amenable to this grand objection, and the Proprietors dare not dispute it. In the construction of "Young Amer-ica," I have gained power, and I defy contradiction; I have lessened friction, and I challenge one word to the contra-ry; I have prevented a wabbling interal motion, and all are compelled to acknowledge it; therefore, I assert that it is far superior to any other Mill. I am now selling this Ten nessee invention at the small sum of FIFTY DOLLARS.

And any one wanting a "good thing," is earnestly re-quested to examine the true merits and principles of this still, and order from the Proprietor or Agents.

EVERY MAN HIS OWN MILLER.

EXCELSIOR CORN AND COB MILL.

SOMETHING ENGIRELY NEW. Patented by Charles Leavitt, February 27th, 1855. THE above cut represents a recent and valuable improvement by Charles Leavitt, in PORTABLE GRAIN MILLS, adapted to crushing Corn and Coblogether for stock, and granding Meal for family use. Mr. Leavitt being the original inventor of this kind of a machine, and from long experience with cast iron corn-crushers, finding that all of them were liable to objections, the most formidable of which was their want of durability or Inost formidable of which was their want of durability or liability soon to wear out, he again went to work with the view of removing the objectionable features. In February, 1855, he succeeded in obtaining letters patent for the "Excelsior Gorn and Cob Mill." and now has the satisfaction of being able to present the above Mill to the farmers of the United States, standing as it does at the head of the list of Corn-Crushers, combining the good qualities of all, exempt from the defects of any, and possessing many new, valuable, and distinguishing features, of which all others are destitute.

we have remarked that the great and heretofore insur-We have remarked that the great and heretofore insurmountable objection, urged with so much force against cast from mills, was their pulpable deficiency in durability. To remore this objection was a sideratum long sought for, and which has been at length attained in the "Excelsion Mill" only; the grinding surface of which consists in moveable rings, made in hard and superior metal, and which, when worn out, can be repeated in five minus shy new rings, at a cost of \$3, which makes the mill as good as new, there being no other part limble to wear out. I wo setts of grinding rings second by each mill, making it equal to two mills. This tentral was a second by no oner mill, should not be overlasked by purchasers, as it insures durability, a consideration of all others the most important.

Another interesting feature in this mill, and one which we think will secure for it a just consideration and acrit, is in its being provided with a meal conditional bushel, instead of being scattered around the mill, as is ordinarily the

case.

This mill having been fairly tested with other mills at the late Fair of the Maryland Agricultural Society, at the Ohio State Fair, and elsewhere, at all of which it established its superiority, we do not besitate emphatically to pro-nousce it pre-eminently superior to any and all other corn crushers of the day, independent of its moveable grinding rings, which feature of itself makes the distinction be-tween the "Excelsior" and all other corn-crushers so broad as to render a comparison superflous, and, as an evidence of our sincerity, we hereby announce that we will give a silver cup to any Corn Crusher that can be produced, of the same size and same length of lever, that will grind finer and faster than the Excelsior, at some time and place to be agreed upon.

Capacity of grinding corn and cobs with two borses from 15 to 20, and with one borse, from 8 to 10 bushels per

Cost of Running the Excelsior Mill for Ten-

Compared with that of other Mills in use at this time. It has been proven by experience, and contrary to gen-eral expectation, that cast iron Mills for grinding Corn, etc., to do the work preperly, will not last more than two years. In view of this lact, the inventor of the Excelsion Mill has labored to produce a machine that will be more economical, and at the same time more effectual. The fol-lowing estimate will show the cost of grinding with each of the Mills now in use for ten years:

Cost of Excelsior Mill, \$50, including an extra set of Grinding Plates, which makes it good for jour years. Cost Grinding Plates, which makes it good for four years. Cost of repairs for six years, \$9, making forten years, \$99.

Cost of common Mills, without any extras, says \$44.—
Cost of running the same for ten years, supposing that the Mill will last as long as the Excelaior Mill without repairs, say to be renewed every two years, which in this case must be done at the expense of a new machine each time, \$170, making for the ten years a cost of \$220. This same rale will apply to any and all of the Mills now in use which come in competition with the Excelsior Mill,
Farmers and others in want of mills for grinding Corn and Cob, etc., will see by the above estimate that the Ex-

and Cob, etc., will see by the above estimate that the Ex-celsior Mill can be used for the purpose requred at less than one third the expense of any other Mill now in use. This Mill may be put up in a few m nutes by any ordi-nary farm hand, printed directions for which accompany

each Mill.

The undersigned having purchased the right to the above Mill in Middle Tennessee, take pleasure in introducing it to the public, believing it to be all that is claimed for it, and well worthy the attention of every Farmer,

STOCKTON'S Patent Straw Cutter. THE multiplicity of Straw Cuiters already before the public, a large proportion of which having failed successfully to stand the test of thorough trial, and having failled far short of the representations of the venders, as well as the expectations of the purchasers, a general distrust has been created in the public mind for all machines of this description. Hence it becomes a consideration of the utmost importance before the general introduction of a machine, come rung which there is so much doubt, and connected with which there have been so many failures, that it should first have been subjected to the most thorough and critical test, and its claim to merit clearly established beyond a doubt. This machine has now been in existence upwards of twelve months, during which time it has been submitted to the reverent tests, and has undergone modifications and alterations, with a view of bringing it as near perfection as possible. It is now complete, and presented to the public in the full confidence that it will meet the wants of the farming community, and sustain the meet the wants of the farming community, and sustain the high reputation it has already obtained, and the opinions

farmed of it by all who have used it.

We claim for it—

1st. Great strength and durability. 2d. An entire freedom from complication, being so simple as to be easily operated by a boy twelve or fifteen years of age, without the slightest fear of derangement 2d. Superiority and excellence of execution, cutting with great ease, rapidity and exactness.

Other advantages might be mentioned, but would occupy too much space.

It possesses one peculiarity, however, so remarkable and important that we cannot forbear making mention of it. We allude to its Everlasting Spring, designed to keep the knife always in its; roper place, and secure uniformity of execution, at the same time yielding to any hard and foreign substance, the appearance of which in most machines would be liable to produce serious injury.

of Blood and all other Lung Complaints tending to Consumption.

The numerous letters we receive from our various signist, informing us of cures effected is their immediate neighborhoods, warrant us in saying it is one of the best, if not the very best Cough Medicine now before the public—it almost invariably relieves and not unfrequently cures the very worst cases. When all other Cough preparations have failed, this has relieved the patient, as Druggists, dealers in Medicines, and Physicians can testify. Ass the Agent in your nearest town, what has been his experience of the effects of this medicine. If he has been selling it for any length of time ho will tell you it is the best medicine extant. Helow we give a few extracts from letters we have received lately regarding the virtues of this medicine.

Dr. S. S. Oslin, of Knoxville, Ga., sayz.—I have been using your Liverwort and Tar very extensively in my practice for three years past, and, it is with pleasure 1 state my belief in its superiority over all other articles with which I am acquainted, for which it is recommended.

Mossrs, Fitzgerald & Brenners, writing from Waynesville, N. C., says:—The Liverwort and Tar is becoming daily more popular in this country, and we think Justly so. All whe have tried it speak in commendable terms of it, and say its very beneficial in alleviating the complaints for which it arecommended.

Our Agent in Pickens District, S. C., Mr. S. R. McFall, assures us that he uses inwith great benefit in his own family and recommended it to his neighbors." He gives an instance of a negro woman in his vicinity, who had been suffering with disease of the Lungs for years, attended with sever cough, who was relieved by the Liverwort and Tar.

AND most beautiful and magnificent addition of Lots AND most beautiful and magnificent addition of Lots ever made to the city of Nashville.

In awarding the palm of Real Estate Supremacy to Warkin's Magnificent Addition to Nashville, we by no means desire or intend to disparage any portion of our beautiful city. On the contrary we assert without fear of successful contradiction, that the grounds around Nashville are more beautiful than those of any other city in America. While heretofore examining the grounds around the city, we found it difficult to determine which were the most beautiful, as each additional examination reemed more pleasing to the eye than the previous. But at the most beautiful, as each additional examination reemed more pleasing to the eye than the previous. But at the late May-Day Celebration by the Pupils of the Nashville High School, we made a thorough examination of Mr Sam'l Watkin's grounds, and became satisfied they were the most beautiful we have ever seen. The STREETS and ALLYS are all most elegantly McAdamined and the Lots most handsomely laid off. The building sites undulating boeatifully towards the streets and alleys. We most earnestly invite all persons who have examined the grounds and those who have not to be present on the premises, at 11 o'clock, A. M., on

o'clock, A. M., on TUESDAY, THE 10TH OF JUNE 1856, and judge for themselves, when we will effer at public sale, a great many beautiful Building Lots on Independence and Pulaski Squares. The grounds are laid off in ence and Pulman Squares. The grounds are laid off in Squares or Blocks, containing each from 26 to 40 Lots. Line street running near the North base of Capitol Hill, is the most central street exceeding through the addition and affording a deligotful drive from the city. Fronting on the north of Line street and opposite Independence Square, and in the space between Park and Robertson streets, Mr. Watkins has laid off a BEAUTIFUL PARK.

We especially invite all enterprising persons in our sister towns, cities and States, who wish to invest capital in one of the most growing cities in the Middle Southern States, or who desire a residence in the most delightful city of the Scuth to atlend our sale on the loth of June.
